Subject Index of Volume 61

Absorption spectroscopy
  tautomerism and stereoisomerism of nitracrine, its nitro isomers and their protonated forms in solution examined by absorption and fluorescence spectroscopy, 343
Acetic acid
  photo-oxidation of acetic acid by oxygen in the presence of titanium dioxide and dissolved copper ions, 269
Acetylenic ketones
  ^{1}H chemically induced dynamic nuclear polarization study of photoinitiated interaction between acetylenic ketones and electron and hydrogen donors, 201
Alkenes
  regioselectivity in the meta photocycloaddition of substituted benzenes to alkenes and 1,3-dienes, 3
Alkylaromatics
  supported redox photosensitizers for the activation of alkylaromatics towards oxygen, 137
Aluminium
  study of 1-naphthol as a fluorescent probe for the sol to gel to xerogel reaction of mixed aluminium and silicon systems, 365
7-amino coumarin
  effect of 1,4-diazabicyclo-[2,2,2]-octane on the laser properties of 7-amino coumarin dyes, 381
Aryl cinnamates
  mechanism of photo-Fries fragmentation of aryl cinnamates in polymer films and in solution, 317
Arylsydnones
  photochemistry of arylsydnones
  Part VI. Peculiarities of the photolysis of *N*-phenylsydnones, 245

Benzene
  regioselectivity in the meta photocycloaddition of substituted benzenes to alkenes and 1,3-dienes, 3
Borohydrides
  borohydride anion exchange resin stabilization of flash-lamp-pumped coumarin dye lasers, 389
Bromoperylenes
  photophysical properties of methylperylenes and bromoperylenes in solution, 191

Carbonate radicals
  reaction of carbonate radical with uranyl ion in aqueous medium: flash photolytic and pulse radiolytic studies, 171
Charge transfer complexes
  polymeric effects in optical spectra of intermolecular charge transfer complexes, 209
Chlorinated derivatives
  sensitized photo-oxidation of dihydroxybenzenes and chlorinated derivatives. A kinetic study, 113
CO molecule
  quenching by noble gases of selected rovibronic levels of the A1Π state of the CO molecule, 289

1,4-diazabicyclo-[2,2,2]-octane
  effect of 1,4-diazabicyclo-[2,2,2]-octane on the laser properties of 7-amino coumarin dyes, 381
1,3-dienes
  regioselectivity in the meta photocycloaddition of substituted benzenes to alkenes and 1,3-dienes, 3
p-dicyanobenzene
  photoamination of phenanthrene in the presence of *p*-dicyanobenzene – a flash photolysis study, 235
Dihydroxybenzenes
  sensitized photo-oxidation of dihydroxybenzenes and chlorinated derivatives. A kinetic study, 113
Dissolved copper ions
  photo-oxidation of acetic acid by oxygen in the presence of titanium dioxide and dissolved copper ions, 269
Dynamic nuclear polarization
  ^{1}H chemically induced dynamic nuclear

polarization study of photoinitiated interaction between acetylenic ketones and electron and hydrogen donors, 201

Electron donors
^{1}H chemically induced dynamic nuclear polarization study of photoinitiated interaction between acetylenic ketones and electron and hydrogen donors, 201
Electron transfer isomerization
inter- and intramolecular electron transfer isomerization of norbornadiene derivatives, 53

Filter effects
kinetic treatment of photochemically induced concurrent isotope exchange and product formation, 301
Flash photolytic studies
reaction of carbonate radical with uranyl ion in aqueous medium: flash photolytic and pulse radiolytic studies, 171
Flash-lamp-pumped lasers
borohydride anion exchange resin stabilization of flash-lamp-pumped coumarin dye lasers, 389
Fluorescence spectroscopy
tautomerism and stereoisomerism of nitracrine, its nitro isomers and their protonated forms in solution examined by absorption and fluorescence spectroscopy, 343
Fluorescent charge transfer
fluorescent charge transfer states in substituted triphenylphosphines, 65
Fluorescent relays
Industrial photochemistry
XVIII: Improvement of photoreaction rates by the use of fluorescent relays — a photoreactor using an optical fibre effect, 253

Guanine
photo-oxygenative polymerization of guanine: the formation of a new material, 281

Hydrogen donors
^{1}H chemically induced dynamic nuclear polarization study of photoinitiated interaction between acetylenic ketones and electron and hydrogen donors, 201
Hydroxyethylcellulose
photocatalytic degradation of hydroxyethylcellulose in aqueous Pt–TiO_2 suspension, 399

Indomethacin
photochemistry of Indomethacin, 27
Isotope exchange
kinetic treatment of photochemically induced concurrent isotope exchange and product formation, 301

Kinetics
kinetic treatment of photochemically induced concurrent isotope exchange and product formation, 301

Light absorption
comment on an expression for the rate of light absorption used by Kemp and Vincze, 407
Luminescence
luminescence from excited tris(2,2′-bipyridine)-ruthenium(II) incorporated into a silk fibroin membrane, 373
Luminescence–pulse radiolysis
time-resolved luminescence–pulse radiolysis determination of the fractions of porphyrin photosensitizer triplets giving rise to singlet excited oxygen on quenching by ground state triplet oxygen, 165

Magnetic isotope effect
photochemistry of 2,2,12-trimethylcyclododecanone and 2,2,12,12-tetramethylcyclododecanone: product distribution, photo-CIDNP and magnetic isotope effect, 35
Methylperylenes
photophysical properties of methylperylenes and bromoperylenes in solution, 191
Molybdenum
photocatalytic system: kinetics and mechanism of the photoreactions of octacyano complexes of molybdenum(IV) and tungsten(IV) with 1,2,3-indane-trione-hydrate, 183

1-naphthol
study of 1-naphthol as a fluorescent probe for the sol to gel to xerogel reaction of mixed aluminium and silicon systems, 365

Nitracrine
tautomerism and stereoisomerism of nitracrine, its nitro isomers and their protonated forms in solution examined by absorption and fluorescence spectroscopy, 343
Noble gases
quenching by noble gases of selected rovibronic levels of the A1Π state of the CO molecule, 289
Norbornadiene derivatives
inter- and intramolecular electron transfer isomerization of norbornadiene derivatives, 53

Octacyano complexes
photocatalytic system: kinetics and mechanism of the photoreactions of octacyano complexes of molybdenum(IV) and tungsten(IV) with 1,2,3-indane-trione-hydrate, 183
Oxygen
supported redox photosensitizers for the activation of alkylaromatics towards oxygen, 137
photo-oxidation of acetic acid by oxygen in the presence of titanium dioxide and dissolved copper ions, 269

Phenanthrene
photoamination of phenanthrene in the presence of *p*-dicyanobenzene — a flash photolysis study, 235
N-phenylsydnones
photochemistry of arylsydnones
Part VI. Peculiarities of the photolysis of *N*-phenylsydnones, 245
Photo-Fries arrangements
mechanism of photo-Fries fragmentation of aryl cinnamates in polymer films and in solution, 317
Photo-oxidation
photo-oxidation of acetic acid by oxygen in the presence of titanium dioxide and dissolved copper ions, 269
sensitized photo-oxidation of dihydroxybenzenes and chlorinated derivatives. A kinetic study, 113
Photo-oxygenation
photo-oxygenative polymerization of guanine: the formation of a new material, 281
Photoamination
photoamination of phenanthrene in the presence of *p*-dicyanobenzene — a flash photolysis study, 235
Photocatalysis
photocatalytic system: kinetics and mechanism of the photoreactions of octacyano complexes of molybdenum(IV) and tungsten(IV) with 1,2,3-indane-trione-hydrate, 183
Photocatalytic degradation
photocatalytic degradation of hydroxyethylcellulose in aqueous Pt–TiO_2 suspension, 399
Photocycloaddition
regioselectivity in the meta photocycloaddition of substituted benzenes to alkenes and 1,3-dienes, 3
Photodecoloration
kinetic study of the photodecoloration mechanism of an inversely photochromic class of compounds forming spiropyrane analogues, 99
Photodeposition
surface photodeposition of metal oxides by decomposition of several group IVA organometallics (benzyltrimethylsilanes and benzyltrimethylstannanes) on TiO_2, 153
Photoinduced electron transfer
comparison of photoinduced electron transfer to singlet and triplet states of safranine T, 91
Photoinitiation
piperazine derivatives used as components in the amine–ketone photocoinitiation system, 125
Photoinitiators
photochemistry in viscous media: interaction between a photosensitizer and a photoinitiator, 47
Photolysis
photoamination of phenanthrene in the presence of *p*-dicyanobenzene — a flash photolysis study, 235
photochemistry of arylsydnones
Part VI. Peculiarities of the photolysis of *N*-phenylsydnones, 245
photolysis products of rose bengal lactone diacetate, 131
Photoreactors
industrial photochemistry
XVIII: Improvement of photoreaction rates by the use of fluorescent relays — a photoreactor using an optical fibre effect, 253

Photosensitizers
photochemistry in viscous media: interaction between a photosensitizer and a photoinitiator, 47
supported redox photosensitizers for the activation of alkylaromatics towards oxygen, 137
Photosynthesis
improved photosynthesis of previtamin D by wavelengths of 280–300 nm, 15
Piperazine derivatives
piperazine derivatives used as components in the amine–ketone photocoinitiation system, 125
Polymer films
mechanism of photo-Fries fragmentation of aryl cinnamates in polymer films and in solution, 317
Polymerization
photo-oxygenative polymerization of guanine: the formation of a new material, 281
polymeric effects in optical spectra of intermolecular charge transfer complexes, 209
Porphyrin photosensitizers
time-resolved luminescence–pulse radiolysis determination of the fractions of porphyrin photosensitizer triplets giving rise to singlet excited oxygen on quenching by ground state triplet oxygen, 165
Previtamin D
improved photosynthesis of previtamin D by wavelengths of 280–300 nm, 15
Pt-TiO_2 suspension
photocatalytic degradation of hydroxyethylcellulose in aqueous Pt–TiO_2 suspension, 399
Pulse radiolytic studies
reaction of carbonate radical with uranyl ion in aqueous medium: flash photolytic and pulse radiolytic studies, 171

Quantum yield
kinetic treatment of photochemically induced concurrent isotope exchange and product formation, 301
Quenching
quenching by noble gases of selected rovibronic levels of the A1Π state of the CO molecule, 289

Radical forming processes
spin-trapping as a tool for quantum yield determinations in radical forming processes, 77
Regioselectivity
regioselectivity in the meta photocycloaddition of substituted benzenes to alkenes and 1,3-dienes, 3
Rose bengal lactone diacetate
photolysis products of rose bengal lactone diacetate, 131

Safranine T
comparison of photoinduced electron transfer to singlet and triplet states of safranine T, 91
Silicon
study of 1-naphthol as a fluorescent probe for the sol to gel to xerogel reaction of mixed aluminium and silicon systems, 365
Silk fibroin membranes
luminescence from excited tris(2,2′-bipyridine)ruthenium(II) incorporated into a silk fibroin membrane, 373
Singlet excited oxygen
time-resolved luminescence–pulse radiolysis determination of the fractions of porphyrin photosensitizer triplets giving rise to singlet excited oxygen on quenching by ground state triplet oxygen, 165
Singlet excited states
photochemistry of Indomethacin, 27
Solid polymer matrices
triplet–triplet absorption and triplet energy transfer of thioxanthone in solid polymer matrices, 227
Spin-trapping
spin-trapping as a tool for quantum yield determinations in radical forming processes, 77
Spiropyranes
kinetic study of the photodecoloration mechanism of an inversely photochromic class of compounds forming spiropyrane analogues, 99
Stereoisomerism
tautomerism and stereoisomerism of nitracrine, its nitro isomers and their protonated forms in solution examined by absorption and fluorescence spectroscopy, 343

Tautomerism
tautomerism and stereoisomerism of nitracrine, its nitro isomers and their protonated forms in solution examined by absorption and fluorescence spectroscopy, 343
2,2,12,12-tetramethylcyclododecanone
photochemistry of 2,2,12-trimethylcyclododecanone and 2,2,12,12-tetramethylcyclododecanone: product distribution, photo-CIDNP and magnetic isotope effect, 35
p-terphenyl
trapping states in *p*-terphenyl single crystals, 217
Thioxanthone
triplet–triplet absorption and triplet energy transfer of thioxanthone in solid polymer matrices, 227
TiO_2
surface photodeposition of metal oxides by decomposition of several group IVA organometallics (benzyltrimethylsilanes and benzyltrimethylstannanes) on TiO_2, 153
Titanium dioxide
photo-oxidation of acetic acid by oxygen in the presence of titanium dioxide and dissolved copper ions, 269
Trapping states
trapping states in *p*-terphenyl single crystals, 217
2,2,12-trimethylcyclododecanone
photochemistry of 2,2,12-trimethylcyclododecanone and 2,2,12,12-tetramethylcyclododecanone: product distribution, photo-CIDNP and magnetic isotope effect, 35
Triphenylphosphines
fluorescent charge transfer states in substituted triphenylphosphines, 65
Triplet decay rates
triplet–triplet absorption and triplet energy transfer of thioxanthone in solid polymer matrices, 227
Triplet oxygen
time-resolved luminescence–pulse radiolysis determination of the fractions of porphyrin photosensitizer triplets giving rise to singlet excited oxygen on quenching by ground state triplet oxygen, 165
Troponoids
changes in electronically excited states and photochemistry of troponoids on complexation with acids, 329
Tungsten
photocatalytic system: kinetics and mechanism of the photoreactions of octacyano complexes of molybdenum(IV) and tungsten(IV) with 1,2,3-indane-trione-hydrate, 183

Uranyl ions
reaction of carbonate radical with uranyl ion in aqueous medium: flash photolytic and pulse radiolytic studies, 171
UV irradiation
changes in electronically excited states and photochemistry of troponoids on complexation with acids, 329
